Find the space for **RA** in your Answer Sheet or mark your answers in this booklet. Do as directed. On the next page there are 12 rows of letters. In each row, you are to look at five sets of letters. *Four* of the five sets follow a certain rule. One set *does not*. On your Answer Sheet (or this booklet), you are to mark the letter of the one set that *does not* follow the rule.

Look at the following example:

- a. BBLJ      b. TTRU      c. FWZP      d. XXBK      e. MMEO

Here you see that in four of the sets, the *first two* letters are the same. In the other one, *c. FWZP*, this rule is *not* followed, so the correct answer to this example is *c*.

Please note that the rules are *not* based on *sounds, shapes or types* (vowel or consonant) of the letters.

Now try another example:

**EXAMPLE-X:**

- a. ABCD      b. GHIJ      c. LMNO      d. QSRT      e. VWXY

In four of these sets, the letters follow one another in alphabetical order. However, in one set, *d. QSRT*, this is not followed, because the S and R are not in the right alphabetical order. Therefore, you should have filled in the *d*. box on your Answer Sheet (or this booklet).

Work *quickly* to finish as many items as you can. You will have *5 minutes*. If you are not sure of the right answer for an item, mark the choice that is your best guess.

If you finish before the time is called, please *STOP* and do not turn to other pages.

**PLEASE WAIT FOR THE INSTRUCTION TO START**
